

Automotive Oil Pump for Engine Lubrication

High-performance oil pump designed for automotive applications ensuring consistent oil pressure. It is constructed from durable materials for long-lasting reliability and optimal engine lubrication.

Product Overview

High-Performance Automotive Oil Pump

This automotive oil pump is precision-engineered to ensure consistent oil pressure and flow, which is critical for optimal engine lubrication and performance. Constructed from durable, high-quality materials, it is designed to meet or exceed OEM specifications for reliability. It serves as an ideal solution for engine rebuilds, routine maintenance, and performance upgrades.

Technical Specifications

Design Standard

OEM Specification Compliant • High-Performance

Application Type

Automotive Engine Lubrication

Engine Part Compatibility

Cylinder Head, Crankshaft, Con Rod, Camshaft, Water Pump, Oil Pump, Alternator, Starter, Turbo Charger

Product Range

Available Variants

500 models
