

Automotive Push Button Engine Start Stop Switch

Push-button engine start/stop system designed for automotive applications. It allows keyless engine ignition and shutdown with an illuminated button indicator.

Product Overview

Automotive Engine Start/Stop System

This automotive push-button engine start/stop system is engineered for seamless keyless ignition and engine shutdown. Designed for universal compatibility with various vehicle models, it enhances user convenience through a simple one-touch operation. The integrated illuminated indicator provides clear feedback on the engine's operational status at all times.

Technical Specifications

User Interface

- Illuminated status indicator
- Tactile push-button design
- Automotive-grade construction

Functionality

Keyless Ignition, Engine Start, Engine Stop

Compatibility

Automotive applications
