

Automotive Radiator Core

This high-performance radiator is designed for efficient engine cooling. It features a durable core construction and optimized fin density for maximum heat dissipation.

Product Overview

High-Performance Automotive Radiator Core

This premium automotive radiator core is engineered for superior engine thermal management. Designed with optimized fin density, it ensures maximum heat dissipation and reliable temperature regulation under demanding operational conditions. Its durable core construction makes it an ideal replacement choice for maintaining engine longevity and performance.

Compatibility

Engine Compatibility

- 403A-15
- 403D-15
- 403F-15
- 403F-15T
- 404A-22
- 404D-22
