Product Overview

High-Performance Automotive Communication

This versatile automotive antenna solution is engineered to provide superior signal reception for a wide range of vehicle communication needs. Designed to support AM, FM, GPS, and cellular frequencies, it ensures clear audio quality and reliable navigation data. With aerodynamic construction and weather-resistant materials, these units are built to withstand diverse environmental conditions while maintaining a sleek, modern aesthetic.

Technical Specifications

Key Features

- Aerodynamic shape for reduced wind resistance
- Weather-resistant construction
- Flexible rod options available
- Durable base mounting system

Frequency Compatibility

AM, FM, GPS, Cellular

Design Styles

Antenna Styles

Standard Rod • Shark Fin
