

Automotive Sanding Abrasive Paper

These abrasive papers are mainly used for polishing paint and plastic surfaces. They feature an anti-clogging design and can be made into Velcro or PSA discs.

Product Overview

Professional Automotive Abrasive Solution

This high-performance sanding abrasive paper is engineered specifically for automotive surface preparation, including paint and plastic polishing. Featuring an advanced anti-clogging design, it ensures consistent performance and longevity during intensive grinding tasks. The material is versatile and can be converted into both Velcro and PSA discs to suit various sanding equipment requirements.

Technical Specifications

Primary Applications

- Automotive paint polishing
- Plastic surface finishing
- Surface preparation
- General grinding

Conversion Compatibility

Velcro Disc • PSA Disc

Key Features

- Anti-clogging coating
- High consistency
- Versatile substrate compatibility

Available Grit Sizes	80, 180, 320, 400
