

Automotive Sandpaper Sheets for Paint and Plastic Polishing

These sandpaper sheets are mainly used for polishing paint and plastic surfaces. They feature an anti-clogging design and can be made into Velcro or PSA discs.

Product Overview

Professional Automotive Abrasives

These high-performance abrasive paper sheets are specifically engineered for automotive surface preparation, including paint removal and smoothing of body panels. Featuring an anti-clogging design, they ensure consistent performance and longevity during intensive sanding tasks. Versatile by nature, the material can be converted into Velcro or PSA discs to suit various power tool configurations.

Technical Specifications

Available Grit Sizes	80, 120, 180, 320, 400
Material Type	Type A/C
Anti-Clogging Technology	Yes

Applications

Primary Applications

- Automotive paint polishing
- Plastic surface finishing
- Automotive body panel smoothing
- Paint removal

Compatibility Options

Hand Sanding • Power Tool Sanding • Velcro Disc Compatible • PSA Disc Compatible
