Product Overview

Comprehensive Vehicle Security Solution

This 1-Way Car Alarm System provides a robust security solution designed for reliable vehicle protection and ease of use. The system integrates advanced features such as shock sensor detection, ignition monitoring, and remote trunk release to ensure comprehensive coverage. Engineered for professional installation with an OE-FIT harness design, it offers low power consumption and intelligent multi-functionality for modern automotive applications.

Security Features

Core Security Functions

- Alarm/Mute arming
- Disarming and door unlocking
- Shock sensor detection
- Ignition detection
- Warning for triggered systems
- Automatic re-arming

Alerts & Monitoring

Door Open Alert, Trunk Open Alert, Hood Open Alert, Footbrake Triggering, Door Close Reminder, Out-of-range Warning

Technical Specifications

Technical Highlights

1 Way

System Type

0 Low

Power Consumption

Certifications

ISO 14001 • IATF 16949 • OHSAS 18001

Installation & Compatibility

Installation Features

- OE-FIT harness design
- Microchip code hopping encoder
- Status preserving
- LED indicator
