

Automotive Sensor Set (Air Flow, ABS, Crankshaft, Camshaft)

This set includes air flow, ABS, crankshaft, and camshaft sensors. These sensors provide essential data for engine management, braking, and overall vehicle performance.

Overview

Professional Automotive Sensor Solutions

This comprehensive sensor set includes essential components for modern vehicle management systems, covering air flow, ABS, crankshaft, and camshaft monitoring. Designed for high accuracy and reliability, these sensors provide critical data for engine management, braking systems, and overall vehicle performance. They are engineered to meet the rigorous standards of both OE and OES markets, ensuring optimal functionality and safety for various vehicle applications.

Product Range

Included Sensor Types

- Air Flow Sensor
- ABS Sensor
- Crankshaft Sensor
- Camshaft Sensor
- EGR Valve
- Truck Sensor
- Exhaust Temperature Sensor

Compliance & Standards

Market Suitability

OE Market • OES Market • OEM Market

Certifications

CE, EAC
