

Automotive Shock Absorber

These high-performance shock absorbers are designed for superior vehicle control and ride comfort. The shock absorbers feature a twin-tube design with hydraulic fluid for effective damping, ensuring durability and long-lasting performance under various driving conditions.

Product Overview

High-Performance Suspension Solution

These shock absorbers are engineered to deliver superior vehicle control and enhanced ride comfort across various driving conditions. Featuring a robust twin-tube design combined with high-quality hydraulic fluid, the unit ensures effective damping and reliable long-term durability. Designed for a direct fit, these components simplify the installation process while significantly reducing body roll and improving overall vehicle stability.

Technical Specifications

Design Architecture	Twin-tube
Damping Medium	Hydraulic fluid
Fitment Style	Direct fit

Features

Performance Advantages

- Enhanced vehicle stability
- Reduced body roll
- Improved ride comfort
- Superior damping performance

Best For	Suspension repair, Performance upgrade, Optimal handling
