Product Overview

High-Performance Automotive Starter

This robust automotive starter motor is engineered for reliable engine ignition across a wide range of vehicle models. It features high-efficiency energy conversion and durable internal components designed for extended service life in demanding environments. Optimized for consistent torque and speed, it ensures quick and reliable starts under various operating conditions.

Technical Details

Identification Numbers

- 201905201-7109K32
- 05 06186
- 0075C01038200
- 150001051

Key Features

High-performance design, Robust construction, Optimized torque, Extended service life
