

# Automotive Starter Motor

High-performance starter motor designed for reliable engine starting. It features a robust solenoid, durable construction, and precise gear engagement for optimal performance and longevity.

## Overview

### High-Performance Automotive Starter

This automotive starter motor is engineered for reliability and consistent performance in demanding heavy-duty applications. It features a robust solenoid and durable construction, ensuring precise gear engagement for optimal longevity. Designed to meet or exceed original equipment specifications, this unit provides a seamless fit and dependable starting power for a range of engines.

## Technical Specifications

### Power Output

**4.5 KW**

Power Rating

Voltage	24 V
Number of Teeth	11
Rotation	Clockwise (CW)

## Compatibility

### Cross Reference Numbers

- 19956N
- 0355-502-0016
- 28100-2625

Compatible Engines	JO8C, JO7C, SO5C, SO5D
--------------------	------------------------
