

Automotive Starting Battery

This high-performance vehicle launch battery is designed for reliable starting power. It features robust construction and optimized internal components for enhanced durability and longevity.

Product Overview

Innovative Green Energy Solution

This patented water-powered battery offers a sustainable, heavy-metal-free alternative to conventional automotive batteries. Engineered for enhanced safety, it eliminates risks of self-ignition and explosion while maintaining stable, long-term voltage output. With a storage life of up to ten years, it serves as a reliable, high-performance replacement for standard vehicle launch batteries.

Performance Metrics

Storage Life

10 years

Shelf Life

Technical Characteristics

Safety Compliance

- Non-explosive chemistry
- Self-ignition resistant
- Stable voltage output

Environmental Profile

Heavy-metal free, Zero pollution, Green energy

Application Details

Compatibility

Automotive vehicle launch battery replacement
