

Automotive Steering Buffer Spring Stopper

This buffer spring stopper is designed for automotive steering systems. It provides cushioning and support to the suspension, reducing noise and vibration.

Product Overview

Automotive Steering Buffer Spring Stopper

This buffer spring stopper is specifically engineered for automotive steering systems to provide essential cushioning and support to the suspension. By absorbing impact and stabilizing movement, it effectively reduces noise and vibration during operation. Constructed from durable rubber, this component is designed for long-lasting performance and high resistance to wear and tear, making it a reliable solution for various vehicle models.

Technical Details

Material

Durable Rubber

Key Features

- Suspension cushioning and support
- Noise reduction
- Vibration dampening
- Wear and tear resistance

Part Number

8091-3K100-DAA

Application

Automotive Steering System
