

Automotive Suspension Coil Spring

This high-performance coil spring is designed for automotive applications. It provides optimal suspension and load-bearing capabilities, ensuring long-lasting performance and reliability.

Product Overview

High-Performance Automotive Suspension Coil Spring

This automotive suspension coil spring is engineered for optimal load-bearing capacity and resilience under demanding conditions. Manufactured using a high-precision hot coiled process, it ensures superior durability and extended service life for vehicle suspension systems. Designed to provide enhanced stability and ride comfort, this component is suitable for a variety of automotive applications.

Technical Specifications

Manufacturing Process	Hot Coiled
Maximum Steel Size	75 mm
Application	Automotive, Suspension System
