

Automotive Suspension Lower Control Arm

This lower arm is designed for automotive suspension systems. It ensures controlled movement of the vehicle's suspension and is constructed from high-strength materials for durability.

Product Overview

Automotive Suspension Lower Control Arm

This lower control arm is precision-engineered for automotive suspension systems, ensuring smooth and controlled vehicle movement. Designed to meet or exceed OEM specifications, it provides a reliable fit and optimal functional performance. Constructed from high-strength materials, this component is built for long-lasting durability and consistent reliability in demanding driving conditions.

Technical Specifications

Quality Standard

OEM Specification Compliant

Compatible Part Numbers

48069-20260, 48069-AT191, YX-02-131

Installation Position

Lower Left (L. LOWER ARM L.)
