

Automotive Tail Light Assembly

This is a tail light assembly designed for automobiles. It incorporates both reflector and lens elements to ensure visibility and compliance with automotive safety standards.

Product Overview

Automotive Tail Light Assembly

This automotive tail light assembly is engineered for durability and reliable performance, ensuring optimal visibility on the road. Featuring a dual-lens design, it integrates dedicated sections for brake, tail, turn signal, and reverse light functions. Designed with precision mounting points, this unit offers a seamless installation process for automotive repair and maintenance needs.
