

Automotive Tie Rod for Steering System

This tie rod is a crucial component in a vehicle's steering system. It connects the steering rack to the steering knuckle, transmitting the force that turns the wheels.

Product Overview

Precision Steering Component

The SC-5286 tie rod is an essential component designed for automotive steering systems. It serves as the critical link between the steering rack and the steering knuckle, effectively transmitting force to ensure smooth and accurate wheel turning. Built for reliability and long-term performance, this steel component is engineered to meet the rigors of demanding driving conditions.

Physical Attributes

Material	Steel
Surface Coating	Black anti-corrosion coating

Technical Specifications

Key Features

- Threaded ends for secure attachment
- High-durability construction
- Precision-engineered interface

Function	Steering System, Automotive Component
