

Automotive Tie Rod with Ball Joints

This black metal rod is a tie rod, a steering linkage component for vehicles. It features ball joints on either end, enabling articulation for effective steering and suspension.

Product Overview

Automotive Steering Component

This automotive tie rod with ball joints is a critical steering and suspension component designed for precise vehicle handling. Engineered for durability, it features high-quality ball joints that allow for smooth articulation in multiple directions. This part is specifically compatible with Carry models from the 1979-1985 production era, ensuring a reliable fit for restoration or maintenance projects.

Compatibility

Compatible Models

- ST30T
- ST40T
- ST30V
- ST40V
- ST30B

OEM Reference Number	48900-79001
Part Number	SD-7450
Model Years	1979-1985
