

Automotive Tire Changer Machine

This tire changer is designed for efficient and safe tire mounting and demounting. It features a robust construction with a red finish, ensuring durability and long-term performance.

Product Overview

Professional Tire Service Solution

This automotive tire changer is engineered for efficient and safe tire mounting and demounting operations. Featuring a robust construction with a durable finish, it is designed to withstand the rigors of high-volume automotive service centers. The machine includes an integrated clamping system, a high-performance bead breaker, and a precision-engineered mounting head to streamline your service workflow.

Construction

Robust Design • Durable Finish

Technical Specifications

Key Components

- Integrated clamping system for secure wheel retention
- Heavy-duty bead breaker assembly
- Mounting head for efficient tire installation
- Precision control panel for operational accuracy

Application & Suitability

Recommended Use

Automotive Service Centers, Repair Shops, Tire Service
