Product Overview

High-Performance Constant Velocity Joint

This automotive tripod CV joint is engineered for seamless power transmission in vehicle drivetrain systems. It features a robust design that accommodates changes in angle and suspension movement while maintaining constant rotational speed. Built for durability and vibration reduction, the kit includes all essential hardware for a comprehensive installation.

Technical Specifications

Included Components

- CV Joint
- Protective Boot
- Lubrication Grease
- Clamps
- Retaining rings
- Cotter pin
- Castellated nut

Compatibility	Nissan Sunny, 2004-1600
OEM Reference	29100-82500

Manufacturing & Quality

Country of Origin

China

Build Material	Hardened steel
