

Automotive Turbocharger

This turbocharger is designed to enhance engine power and efficiency. It features a precision-engineered turbine and compressor wheel for optimal airflow and boost pressure.

ADDITIONAL IMAGES

Product Overview

High-Performance Turbocharger

This high-performance turbocharger is engineered to significantly enhance engine power and overall fuel efficiency. Featuring a precision-engineered turbine and compressor wheel, it ensures optimal airflow and boost pressure across various automotive applications. The unit includes an integrated wastegate actuator to provide precise boost control and essential protection against overboost conditions.

Technical Specifications

Key Features

- Precision-engineered turbine
- Optimized compressor wheel
- Forced induction ready
- High-temperature material construction

Boost Control System

Integrated wastegate actuator

Identification

Identifiers

Effbe+C2, 4010487A

Production Date

30.01.16
