

# Automotive Turbocharger with Gaskets

This turbocharger enhances engine power and efficiency. It features durable construction with a blue compressor housing and includes gaskets for installation.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Automotive Turbocharger

This premium automotive turbocharger is engineered to significantly boost engine performance by increasing intake air density. Constructed from durable steel, the unit offers robust reliability for demanding automotive applications. Each assembly includes essential gaskets to ensure a seamless installation process for professional technicians.

## Technical Specifications

Net Weight	14 Kg
Material	Steel

## Performance Metrics

### Key Functional Benefits

- Increased engine power output
- Improved intake density
- Forced induction efficiency

## Package Contents

Included Components	Turbocharger unit, Installation gaskets
