

Automotive V-Belt for Engine Power Transmission

This V-belt is engineered for automotive engine power transmission. Constructed from durable materials, it offers reliable performance and an extended service life.

Product Overview

High-Performance Automotive V-Belt

This automotive V-belt is engineered for reliable engine power transmission, featuring a robust construction of CR and EPDM materials. Designed to withstand demanding operating conditions, it offers an extended service life of up to 80,000 kilometers. With precision molding for optimal grip, this belt ensures consistent performance for various automotive applications.

Technical Specifications

Belt Type	AVX10x938La
Materials	CR, EPDM

Performance Metrics

Service Life Span

30000 KMS

Minimum Life Span

80000 KMS

Maximum Life Span

Logistics & Ordering

Available Shipping Ports

- Ningbo
- Shanghai
- Yiwu
- Guangzhou

Minimum Order Quantity	200 PCS
Standard Delivery Time	20 Days

Packaging

Packaging Standards	Customizable (Box or Bag)
Carton Specification	Standard Exporting Carton
