Product Overview

High-Performance Automotive V-Ribbed Belt

This automotive V-ribbed belt is engineered for efficient power transmission in engine accessory drives, featuring a durable construction with multiple ribs for enhanced grip. Built to withstand demanding automotive environments, it offers superior resistance to oil, heat, and chemical exposure. With its robust reinforcement materials and adherence to rigorous quality standards, this belt ensures reliable performance and longevity in critical engine systems.

Construction & Materials

Reinforcement Materials

- Fiber-glass cord
- Elastic nylon cloth

Base Materials

CR, EPDM, HNBR

Performance & Standards

Resistance Features

Oil Resistant • Heat Resistant • High-Temp Resistant • Chemical Resistant

Compliance Standard

GB/T1171-1996

Quality Assurance

Yes
