

Automotive Vacuum Cleaner

This compact vacuum cleaner is designed for automotive use. Its lightweight design allows for easy maneuverability within a vehicle, and it features a transparent dust container.

Overview

Compact Automotive Cleaning Solution

This portable automotive vacuum cleaner is engineered for efficient car interior maintenance, offering consistent performance through a reliable DC 12V connection. Its lightweight and compact build ensures easy maneuverability, allowing users to reach tight corners and crevices within the vehicle. Featuring a transparent dust container, it provides immediate visual feedback on fill levels for timely emptying during extended cleaning sessions.
