

Automotive Water Wash Spray Booth

This water wash spray booth is designed for automotive painting. It utilizes a water-based system to capture and filter paint overspray for a clean, safe operation and high-quality finishes.

Overview

Professional Automotive Water Wash Spray Booth

This water revolving spray booth is engineered for professional automotive painting applications. By utilizing an advanced water-based system, it effectively captures and filters paint overspray to maintain a pristine, safe working environment. The integrated revolving mechanism facilitates uniform paint application, ensuring a high-quality finish for various automotive components in industrial or refinishing facilities.

Technical Specifications

Key Operational Features

- Water revolving mechanism
- Uniform spray coverage
- High-efficiency overspray filtration
- Clean air working environment maintenance

Filtration Type

Water-based overspray capture system

Primary Application

Automotive Refinishing, Industrial Painting, Automotive Manufacturing
