

Automotive Wheel Hub Bearing

This precision-engineered hub bearing is designed for optimal performance and durability in automotive wheel applications. It provides smooth and reliable rotation, ensuring efficient power transfer and reduced friction.

Product Overview

Precision-Engineered Hub Bearing

This automotive wheel hub bearing is designed for optimal performance, durability, and smooth rotation in demanding vehicle applications. Engineered to meet stringent quality standards, it ensures efficient power transfer while maintaining exceptional load-bearing capacity and resistance to wear and tear. Ideal for various vehicle makes and models, this component is built to provide safe, stable handling and long-lasting reliability.

Technical Specifications

Part Number	300071103
Markings	COOPE, R

Logistics & Service

Shipping & Handling

- Quick delivery
- Safe packing
