Automotive Windshield Washer Pump

Compact electric pump designed for automotive windshield washer systems. It operates on a 12V DC power supply and features a durable plastic housing with integrated connector and hose barb outlet.

Product Overview

Automotive Windshield Washer Pump

This compact electric windshield washer pump is designed for reliable automotive fluid delivery. Featuring a durable plastic housing and a standardized 12V DC power connection, it ensures efficient operation for clear windshield visibility. The integrated hose barb outlet allows for seamless and quick installation, making it an ideal choice for replacing worn or malfunctioning units across various vehicle models.

Technical Specifications

Operating Voltage

12 V DC
Rated Voltage

Material Composition	Durable Plastic

Installation and Compatibility

Component Type

Replacement Part • Automotive Electrical

Installation Method	Hose barb outlet for simplified integration
