

Automotive Windshield Washer Pump

This windshield washer pump is designed for automotive applications. It is electrically powered and sprays washer fluid onto the windshield for cleaning.

Product Overview

High-Performance Washer Fluid Pump

This automotive windshield washer pump is engineered to deliver reliable fluid pressure for consistent windshield cleaning. Its compact, durable construction features a robust black body with a blue pump head, ensuring compatibility with standard automotive fluid delivery systems. The unit includes optimized fluid intake and output ports alongside a standard electrical connector for seamless integration during replacement or repair projects.
