

Automotive Xenon Headlight Bulb

High-intensity xenon headlight bulb designed for automotive lighting applications. This bulb provides a bright, focused beam for enhanced visibility and safety during nighttime driving.

Product Overview

High-Intensity Automotive Illumination

This high-intensity xenon headlight bulb is engineered to provide a bright, focused beam for superior visibility during nighttime driving. Designed with a robust construction, it ensures long-lasting performance and consistent reliability for automotive applications. The bulb is compatible with a wide range of vehicle headlight systems, offering optimal light output and color temperature to significantly improve road illumination and safety.

Technical Specifications

Key Performance Features

- High-intensity light output
- Focused beam pattern
- Robust vibration-resistant construction
- Reliable long-life operation

Technology Type	Xenon HID
Vehicle Compatibility	Automotive, Universal Fitment
