

Automotive Xenon HID Headlight Bulb

This is a Xenon HID (High-Intensity Discharge) headlight bulb designed for automotive applications. It features a glass capsule containing xenon gas and metal halide salts, which produce a bright, white light when an electrical arc is passed between two electrodes.

Product Overview

High-Performance Automotive Lighting

This Xenon HID (High-Intensity Discharge) headlight bulb is engineered for superior automotive visibility. Utilizing a glass capsule filled with xenon gas and metal halide salts, it generates a bright, white light through an electrical arc. Designed for durability and high luminous efficacy, this bulb enhances safety during nighttime driving conditions.

Technical Specifications

Light Color

Bright White

Construction Materials

- Glass capsule
- Xenon gas
- Metal halide salts

Lighting Technology

Xenon HID (High-Intensity Discharge)
