

Autonomous Commercial Floor Sweeper

The autonomous commercial floor sweeper is designed for efficient and thorough cleaning of large indoor spaces. Equipped with dual rotating brushes, it effectively sweeps debris and dust from various floor surfaces.

Overview

Autonomous Commercial Floor Sweeper

This high-performance autonomous commercial floor sweeper is engineered for efficient cleaning in large indoor environments such as warehouses, factories, and shopping malls. Featuring advanced navigation and obstacle avoidance technology, the unit ensures safe operation while optimizing cleaning routes for maximum coverage. Its durable construction and large-capacity hopper provide a labor-saving, cost-effective solution for maintaining clean and hygienic floors.

Technical Specifications

Navigation & Safety

- Advanced Autonomous Navigation
- Obstacle Avoidance Technology
- Integrated Sensor Suite
- Precise Mapping

Cleaning System

Dual Rotating Brushes, Debris Collection, Dust Management

Applications

Ideal Environments

Warehouses • Factories • Shopping Malls • Large Commercial Spaces
