

Autonomous Robotic Lawn Mower

This autonomous robotic lawn mower is designed for residential use. It features obstacle avoidance, automatic recharging, and programmable mowing schedules.

Overview

Smart Residential Mowing Solution

This autonomous robotic lawn mower is engineered for efficient and hands-free lawn maintenance. Featuring advanced obstacle avoidance and a precision mulching blade system, it ensures a healthy, manicured lawn with minimal intervention. Its weather-resistant construction and intelligent automatic recharging capabilities make it a reliable choice for diverse residential landscapes.

Performance Metrics

Performance Highlights

20 Lithium-ion

Battery Technology

Technical Specifications

Operational Features

- Automatic recharging system
- Programmable mowing schedules
- Adjustable cutting height
- Mulching blade system
- Smartphone app connectivity

Environmental Resistance

Weather-resistant

Safety Features

Lift sensors, Tilt sensors, Automatic blade stop, Perimeter wire boundary
