

Autonomous Robotic Vacuum Cleaner with HEPA Filter

This autonomous robotic vacuum cleaner is designed for automated floor cleaning. It is equipped with a high-efficiency particulate air (HEPA) filter for improved air quality and can navigate under furniture.

Product Overview

Autonomous Efficiency

The EC02 robotic vacuum cleaner offers a professional-grade automated floor cleaning solution designed for diverse environments. It features a specialized high-vacuuming system that provides 5 to 8 times more power than standard cleaners while maintaining an ultra-quiet 55 dB noise level. Equipped with advanced obstacle avoidance and a HEPA filtration system, it ensures both spotless floors and improved indoor air quality.

Technical Specifications

Filtration System	HEPA Filter
Compatible Surfaces	Hardwood, Tile, Carpet

Features

Key Capabilities

- Programmable cleaning schedules
- Advanced obstacle avoidance sensors
- Self-charging docking station
- Compact design for low-profile cleaning
