

Axe with Plastic-Coated Fiberglass Handle

This axe features a plastic-coated fiberglass handle for enhanced grip and durability. The axe head is made of high-quality steel, making it suitable for splitting wood and other outdoor tasks.

Product Overview

High-Performance Splitting Axe

This professional-grade axe features a high-quality steel head designed for efficient wood splitting and heavy-duty chopping tasks. The advanced fiberglass handle is engineered for superior strength and vibration reduction, ensuring user comfort during extended use. A durable plastic coating provides an enhanced, non-slip grip while protecting the handle from environmental wear and tear, making it an ideal tool for demanding outdoor environments.

Technical Specifications

Head Material	High-quality steel
Handle Material	Fiberglass with plastic coating
Key Features	Vibration Reduction, Non-slip Grip, Wear Resistant, Heavy Duty

Usage

Primary Applications

- Wood splitting
- Chopping tasks
- Outdoor maintenance
