

Axe with Plastic-Coated Fiberglass Handle

This axe features a plastic-coated fiberglass handle for enhanced grip and durability. It is designed for various cutting and chopping tasks, offering a combination of strength and lightweight construction.

Product Overview

Professional Grade Chopping Axe

This axe features a specialized plastic-coated fiberglass handle, meticulously designed to provide both superior durability and a comfortable, secure grip for the operator. Engineered for a variety of cutting and chopping tasks, it balances structural strength with a lightweight profile to ensure maximum efficiency during extended use. The protective plastic coating not only enhances handling but also safeguards the fiberglass core, ensuring long-term reliability even in demanding work environments.

Technical Specifications

Primary Applications

- Cutting tasks
- Chopping tasks

Handle Material	Fiberglass with plastic coating
Handle Features	Plastic-coated, Fiberglass core, Ergonomic grip, Durable

Performance Highlights

Key Performance Metrics

1 Fiberglass

Core Material

1 Plastic-Coated
