

Axial Fan Blade for Electrical and Exhaust Fans

This three-blade axial fan is designed for electrical and exhaust fans. It is constructed from stamped metal and features aerodynamically shaped blades for efficient air movement.

Overview

High-Efficiency Axial Fan Blade

This three-blade axial fan is engineered for optimal performance in both electrical and exhaust ventilation systems. Its stamped metal construction ensures durability and structural integrity, while the aerodynamically shaped blades are designed to maximize airflow efficiency. Featuring a robust central hub with multiple mounting holes, this component provides a secure and reliable attachment to motor shafts for various household and industrial applications.

Technical Specifications

Blade Configuration	3-Blade Axial Design
Material	Stamped Metal
Mounting System	Central hub with multiple mounting holes

Applications

Suitable Applications	Electrical Fans, Exhaust Systems, Industrial Ventilation, Household Appliances
