

Axial Fan for Apparel Machinery

This axial fan is designed for cooling applications within machinery and industrial settings, especially apparel and textile machinery. Its square frame includes mounting holes for secure installation and the fan blades are optimized for efficient airflow.

Product Overview

High-Performance Cooling Solution

This axial fan is specifically engineered for cooling applications within apparel and textile machinery. Designed with a robust square frame and optimized blade geometry, it ensures efficient airflow and reliable heat dissipation. Built from durable materials, this component is crafted to withstand the demanding conditions of industrial environments.

Design & Construction

Primary Application

Apparel Machinery • Textile Machinery • Industrial Cooling

Frame Shape

Square

Mounting

Mounting holes included, Secure installation

Performance

Airflow Optimization

Optimized blade design for high-efficiency heat dissipation
