

# Axial Fan for Refrigeration Equipment

Axial fan designed for refrigerators and refrigeration equipment. It features a shaded pole motor, ensuring efficient and reliable performance.

## Product Overview

### Compact Cooling Solution

The YJF series shaded pole motors provide a compact, lightweight solution for various cooling and ventilation needs. Designed with a focus on longevity and reliability, these motors offer quiet operation and stable performance in demanding environments. They are compliant with RoHS material standards and support a service life exceeding 20,000 hours.

## Technical Specifications

### Average working life

**20000 hours**

Operating Life

### Ambient temperature range

Bearing Type	Temperature Range
Ball bearing	-20 ~60
Sleeve bearing	0 -50

## Compliance and Standards

### Certifications

CCC • CE • UL • RoHS

## Product Features

### Key Features

- Compact and lightweight structure
- Low noise performance
- High reliability and longevity
- Easy installation

## Applications

### Primary Applications

Refrigeration equipment, Power supply circuits, Electric welding machines, Ventilation systems
