

Axial Fan Motor for Air Conditioners

This axial fan motor is designed for air conditioners and ventilation equipment. It features a robust construction that ensures durability and efficient airflow for various industrial and commercial cooling applications.

Overview

High-Efficiency Axial Fan Motor

This axial fan motor is specifically engineered for air conditioning and ventilation systems, prioritizing stable operation, low noise output, and high energy efficiency. Designed for durability, it offers a long service life and is built to withstand challenging ambient temperatures. It is a reliable component suitable for a wide range of industrial and commercial air circulation applications.

Technical Specifications

Available Sizes	200mm to 900mm
Protection Class	IP44, IP54
Insulation Grade	B, F

Performance

Operating Temperature

-30 °C Min Temperature	60 °C Max Temperature
----------------------------------	---------------------------------

Service Life	30,000 to 50,000 hours
--------------	------------------------

Compliance

Certifications

CE • CCC
