

Axial Flow Fan Impeller

High-efficiency three-blade axial flow impeller designed for ventilation and air movement applications. It is constructed from durable materials and features aerodynamically optimized blades for maximum airflow and reduced noise.

Product Overview

High-Efficiency Axial Flow Impeller

This high-efficiency three-blade axial flow impeller is engineered for superior ventilation and air movement performance. Constructed from durable materials, it features aerodynamically optimized blades designed to maximize airflow while minimizing operational noise. It is an ideal component for industrial fans, exhaust systems, and various air handling equipment requiring reliable, long-lasting performance.

Technical Specifications

Suitable Applications

- Industrial Fans
- Exhaust Systems
- Air Handling Equipment

Blade Count	3
Key Design Features	Aerodynamically Optimized, Robust Hub Design, Balanced Blades, High Flow Rate

Performance

Operational Characteristics
