

Axial Ventilation Fan

High-efficiency axial fan designed for ventilation and air circulation. Features five aerodynamically optimized blades for maximum airflow and reduced noise.

Product Overview

High-Efficiency Ventilation Solution

This axial ventilation fan is engineered for optimal air circulation and ventilation performance. It features a five-blade design that is aerodynamically optimized to maximize airflow while keeping operational noise levels to a minimum. Built with durable, corrosion-resistant materials, this unit is designed for long-term reliability in demanding exhaust and cooling environments.

Technical Specifications

Number of Blades	5
Blade Technology	Aerodynamically optimized

Construction & Durability

Material Features	Corrosion-resistant, Durable
-------------------	------------------------------

Applications

Suitable Applications

- Exhaust systems
- General ventilation
- Air circulation
- Cooling systems
