

Axial Ventilation Fan for Air Conditioning

This multi-blade axial fan is designed for air conditioning and ventilation equipment. Its durable plastic construction and aerodynamically shaped blades ensure efficient airflow in electric fans and exhaust systems.

Product Overview

High-Efficiency Axial Ventilation

This multi-blade axial fan is engineered specifically for air conditioning and ventilation equipment applications. Featuring a central hub design with aerodynamically optimized blades, it ensures efficient airflow performance. Constructed from durable, high-quality plastic, this component is ideal for integration into household electrical appliances and exhaust systems.

Technical Specifications

Material	Durable Plastic
Primary Applications	Air Conditioning, Ventilation Equipment, Exhaust Systems, Household Appliances

Design Features

Structural Components

- Central hub assembly
- Multi-blade configuration

Blade Characteristics	Aerodynamically shaped for optimized airflow
