

Back Latching Seaming Machine

This back latching seaming machine is engineered for efficient and precise seaming operations. It enhances productivity in garment production and is ideal for various fabric types, ensuring durable and professional seam finishes.

Overview

High-Performance Seaming Solution

This back latching seaming machine is engineered for high-speed industrial textile and apparel manufacturing. Designed to deliver precision and efficiency, it supports consistent, durable seam finishes across various fabric types. With a maximum speed of 6000 stitches per minute, it is built to enhance productivity in professional sewing environments.

Performance Metrics

Max Sewing Speed

6000 s.p.m.
