

Backflow Prevention Check Valve

This check valve is designed to allow fluid to flow in only one direction, preventing backflow. It is constructed from durable materials and ensures reliable performance in various industrial applications.

Overview

Industrial Backflow Prevention

This industrial check valve is engineered to ensure unidirectional fluid flow, effectively preventing backflow in critical pipeline systems. Constructed from robust materials like 304 stainless steel and WCB carbon steel, it provides exceptional durability and reliable sealing for demanding industrial environments. Designed for versatility, this valve is suitable for a wide range of applications including HVAC, plumbing, and complex industrial flow control systems.

Technical Specifications

Pressure Rating

150 PSI

Pressure Class

Connection Types

- Flanged
- Threaded

Construction Materials

304 Stainless Steel, WCB Carbon Steel

Size Rating

8 inch

Application

Suitable Industries

Plumbing • HVAC • Industrial Systems
