Product Overview

Versatile Backhoe Loader Performance

This backhoe loader is designed for demanding construction environments, combining strong digging performance with efficient material handling capabilities. It features a robust engine with high torque and a specialized transmission system to ensure power and responsiveness on diverse job sites. With advanced operator ergonomics, including an air-suspension seat and pilot-controlled joysticks, it is engineered for maximum productivity and comfort during extended shifts.

Engine and Performance

Engine Type	Weichai-Deutz WP4G95E221
Engine Features	Four-stroke, Direct injection, Turbo charged, Fuel efficient

Drivetrain

Transmission	CARRARO four-speed synchronization shift
Drive System	4WD

Safety and Cabin

Safety Standards

ROPS • FOPS

Cabin Features

- Air-suspension seat
- Optional seat warmer
- Optional air conditioner
- Excellent all-around visibility
- Pilot joystick controls

Operational Capabilities

Side Shift	Yes
Boom Configuration	Optional telescopic boom
Stabilizer Geometry	A Shape, H Shape
