Overview

High-Performance Backhoe Loader

This versatile backhoe loader is engineered for maximum efficiency, offering robust performance in digging, loading, and material handling tasks. Designed with operator comfort and visibility in mind, it features an ergonomic cabin, intuitive pilot joystick controls, and a powerful engine to tackle demanding construction and agricultural environments. Its flexible configuration options, including telescopic booms and various stabilizer designs, ensure adaptability across diverse job sites.

Engine & Performance

Engine Performance

4 stroke
Stroke Count

Engine Features

Inline direct injection, High torque, Fuel efficient, Low noise, Low emission

Transmission & Drivetrain

Speed Settings

- 2 speed forward
- 2 speed reverse

Transmission

Power shuttle transmission with torque converter

Drive System

4WD

Operator Environment

Cab Comfort & Safety	ROPS structure, FOPS structure, Air-suspension seat, Optional seat warmer, Optional air conditioner
Control System	Multifunction pilot joystick for effortless, one-handed operation

Operational Design

Stabilizer Options

Design	Key Benefit
A Shape	Strong working stability
H Shape	Wide working range, excavating along walls

Versatility Features

Quick Hitch Couplers • Hydraulic Side Shift • Telescopic Boom Option
