

Backpack Leaf Blower

This backpack blower is designed for efficient leaf and debris removal. It features a powerful engine, ergonomic harness, and variable speed control for optimal performance and user comfort.

Product Overview

High-Efficiency Backpack Blower

This professional-grade backpack leaf blower is engineered for optimal performance and user comfort. Featuring an optimized impeller and advanced engine cooling system, it delivers high wind speed and volume while maintaining exceptional fuel efficiency. The ergonomic design, including a double-shoulder harness and lightweight frame, ensures it remains comfortable during extended operation for road cleaning, lawn maintenance, or snow removal tasks.

Technical Specifications

Fuel Consumption

650 g/h

Fuel Consumption

Machine Weight

8.8 kg

Frame Material

PP (Polypropylene)

Design & Ergonomics

Ergonomic Highlights

- 60-degree engine angle for improved center of gravity
- Double shoulder strap simulation for weight distribution
- Back frame air inlet for heat dissipation
- Bottom opening for increased air intake

Applications

Primary Applications

Road Cleaning, Lawn Cleaning, Snow Removal, Fire Fighting
