

Backpack Sprayer Duster for Agriculture

This sprayer duster is a versatile machine for agricultural and industrial applications, combining spraying and dusting functions. It delivers high-volume output for effective distribution of liquids and powders, with an ergonomic design for operator comfort.

Overview

Professional Agriculture Sprayer & Duster

The 3WF18-9 is a versatile, dual-purpose machine engineered for efficient agricultural pest control, fertilization, and sanitation. This back-pack-mounted unit combines advanced spraying and dusting capabilities with a high-performance engine for uniform output. Designed for heavy-duty use, it features an ergonomic harness system to ensure operator comfort and sustained productivity during long application sessions.

Technical Specifications

Model Number	3WF18-9
Supporting Power	1E40F
Net Weight	11.5 kg
