Product Overview

High-Efficiency Bagged Canister Vacuum

This advanced canister vacuum cleaner is engineered for professional-grade environmental cleaning with a focus on high suction efficiency. Featuring an ECO-design architecture, it combines a large-capacity dust bag system with a sophisticated multiple-filtration process to prevent secondary pollution. Operating at a silent 69dBA, it offers a powerful yet unobtrusive cleaning solution for various commercial and residential environments.

Performance & Technical

Noise Level

69 dBA

Operating Noise

Filtration System

Multiple filtration system

Design Features

ECO Design, High Suction Efficiency, Bagged System, No Secondary Pollution

Usability

Control Interface

- LED Screen Display
- Variable power control knob
- Dust bag full indicator
- Push-button cleaning modes

Portability

Compact design with integrated carrying handle and large mobility wheels
